

## INTRODUCING A NEW WALL PANEL SYSTEM (that works with yours)

Versatile in design and application, this system is built strong, light weight, and packed with every feature we can incorporate. The panel is built entirely with a new unique all aluminum extrusion allowing for limitless capabilities in all directions and total integration.

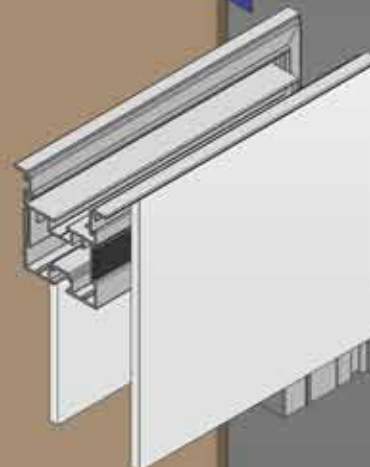

### **Innovation and inspiration fuel Highmark wall panels.**

- Light weight and strong aluminum extrusion construction
- Accepts acrylic, sintra, or other substrate in-fills
- Available with fabric exteriors per panel or in an array
- Capable of housing internal lighting and wiring
- Connect with other popular 3rd party wall systems
- Straight or curved panels of multiple sizes and radii
- Built with either KD mechanical and/or welded assembly
- Panels can be stacked for taller design applications
- And much more...

**create fabric walls**  
via "slide in" fabric  
spline extrusion

**create sintra or other  
substrate hard walls**  
via 3mm or 6mm  
material velcro recess  
channels

**create acrylic walls**  
via "slide in" acrylic  
retainer extrusion

**works with yours**  
open extrusion allowing for  
3rd party locks and  
accessories
